Production of drugs

202. SHRI BEKAL UTSAHI:
SHRI RAJNI RANJAN SAHU:

Will the Minister of PETROLEUM AND CHEMICALS be pleased to state:

(a) what was the production of monitored drugs during the last three years, year-wise;

(b) what are the names of drugs where production has declined and what are the reasons for this decline in production;

(c) what remedial steps have been taken in this regard;

(d) what are the names of drugs which are being produced from intermediate stage and since when each is being produced; and

(e) what are the details of Phased Manufacturing programme in each case and by when basic production would start in each case?

THE MINISTER OF PETROLEUM AND CHEMICALS AND PARLIAMENTARY AFFAIRS (SHRI SATYA PRAKASH MALAVIYA): (a) Production of monitored drugs is regularly published in the annual performance budgets of this Ministry copies of which are available in the Parliamentary Library.

(b) and (c) Names of drugs whose production was less in 1989-90 compared to 1988-89 are given in the statement. The fall in production is due to several factors including drug obsolesence, introduction of better and more potent drugs, corporate plans of the company market demand etc. The various provisions of drug policy

are directed towards encouraging production of bulk drugs in the country.

(d) and (e) Several drugs such as Ethambutol, Rifampicin, Pyrazinamide Chloroquin, Amodiaquine etc. are being poduced from the intermediate stage since several years. As per PMP fixed for several drugs, companies are permitted to produce from intermediate stage for a period ranging generally from two years to three years. Depending on factors like availability of technology etc. extension beyond this period are also granted on case to case basis.

Statement

1. *Penicillin*
2. Streptomycin.
3. Ampicillin.
4. Doxycycline
5. Rifampicin
6. Cloxacillin
7. Sulphadimidine.
8. Phthalyl Sulphathiazole
9. Sulphadiazine
10. Sulphamoxole
11. Sulphaguanidine
12. Sulphasomidine
13. Sulphanilamide
14. Polio Acid
15. Nicotinamide
16. Nicotinic Acid
17. Vitamin B6
18. Analgin
